

AFA – 1 Cement Antifoam

Applications:

AFA-1 is a liquid cement defoamer that will decrease the amount of foaming that occurs while blending slurries, thereby increasing compressive strengths, and preventing the slurry from foaming over the tank.

Properties:

Appearance White liquid - Silicone Emulsion
Specific Gravity 1.00 @ 68°C

Advantages:

- Reduces/prevents slurry foaming
- Compatible with all cement slurries
- Effective in low to medium temperature applications
- Works well when added to mix water

Disadvantages:

- Difficult to blend in field
- Must be blended with methanol to prevent freezing

Handling Precautions:

- Skin and eye irritant
- Gloves and goggles should be worn at all times
