

AFA-4S Cement Antifoam

Applications:

AFA-4s is a powder cement defoamer which decreases/eliminates foaming that occurs while mixing slurries. It prevents the slurry from foaming over the tank and optimizes density control increasing compressive strengths. AFA-4s is environmentally friendly.

Properties:

Appearanceoff White to Light Brown
Physical State.....Powder

Advantages:

- Rapid reduction/prevention of slurry foaming.
- Environmentally friendly.
- Can be dry-blended or pre-hydrated.
- Compatible with all cement systems.
- Effective at low concentrations.

Disadvantages:

- Higher concentration required in lower density blends.
- Most effective when dry blended.
- If excessive foaming occurs, AFA-1 or AFA-2 may be required as back-up.

Handling Precautions:

- Contact with skin and eyes should be avoided.
- Work in a ventilated area.
- Goggles and dust mask required.
