

TDF – 3

Trican Dispersed Fluid Loss

LIBERTY

Applications:

TDF-3 is a unique blend of polymers & dispersants, providing calcium chloride compatibility along with non-linear fluid loss properties. TDF-3 is designed for low to moderate temperature cement applications, creating reduced slurry viscosity characteristics even in the presence of cement accelerators.

Properties:

Appearance: Yellowish Powder
Specific Gravity: 1.55

Blended Product

Advantages:

- Calcium chloride compatible.
- Enhanced rheological characteristics.
- Helps to control gas migration.
- Cost effective fluid loss additive.
- Reduces chemical attack on cements from acids and brines.

Disadvantages:

- Not recommended for use above 200°F.
- Extremely difficult to pre-hydrate (Do not pre-hydrate).

Handling

Precautions:

- Contact with skin and eyes should be avoided.
- Work in a ventilated area, use of goggles & dust mask required.
