

Trican LCM Lost Circulation Material

LIBERTY

Applications:

Trican LCM is a blend of various loss circulation materials that can be dry blended into all cement systems. It is used to heal loss circulation zones through a multiple particle packing technique. Trican LCM can be added to Optimum Flush in both production casing and as a viscous flush ahead of a high feed rate squeeze application.

Properties:

Appearance Black
Compatiblewith all additives
and cement systems
Typical Concentrations..... 1.0% to 3.0% B.W.O.C

Advantages:

- Multiple particles packing technique.
- Decreases fall back and loss circulation.
- Blended into the dry cement.
- Acid Soluble.
- Complete compatibility with all cement additives and systems.

Disadvantages:

- Maximum application temperature of 220°F.

Handling Precautions:

- Contact with skin and eyes should be avoided.
- Work in a ventilated area.
- Use of goggles & dust mask required.
