

Trican LCF Lost Circulation Fiber

LIBERTY

Applications:

Trican LCF is a monofilament fiber that can be added to all cement systems. It is used to heal loss circulation zones and increase cement durability. Trican LCF can be added to all preflushes to enhance hole cleaning and stop losses into thief zones.

Properties:

Appearance light brown
Compatiblewith all additives
and cement systems
Typical Concentrations..... 16.7 lb/1000 gal

Advantages:

- Bridging action.
- Decreases fall back and loss circulation.
- Added to mixing tub if required.
- Increases cement durability.
- Promotes filter cake formation.
- Complete compatibility with all cement additives and systems.

Disadvantages:

- Material can not be dry-blended.

Handling Precautions:

- Contact with skin and eyes should be avoided.
- Work in a ventilated area.
- Use of goggles and dust mask required.
